

## Overview MobiCall - Alarm, Conference, and Information System

## MobiCall

...security under control

by New Voice since 1991

### MobiCall: Alarm, Conference, & Information System

Industry-tested alarm management for security, telecommunications, & information technology.

- Alarm notification, mobilization and evacuation
- Emergency calls (911/112/999)
- Personal security
- Conferences and hotlines
- Voice recording
- Customer-specific applications

### Expansion to Maximum Availability:

- Fully redundant, centrally-managed Mobicall systems within network with automatic "hot standby" switching
- Freely definable Master / Slave responsibility per alarm input
- Watchdog, backup and version concepts

### Fully Integrated Solutions with:

- Alcatel-Lucent, Aastra, Avaya, Cisco Systems, Ericsson, Nortel, Panasonic, Philips, Siemens
- Interfaces:  
ISDN Q.Sig-GF (CorNet), PCM, PSTN / high-impedance (recording), H.323 / SIP, XML and Message Link (IP serial)

### Alarm Triggering:

- From every telephone
- Potential free signal contact inputs and outputs
- Fully integrated solution with IP-WAGO-I/O-SYSTEM 750 components ([www.wago.com](http://www.wago.com))
- Contact management for 64 I/O controllers distributed centrally or decentrally within the network

### Flexible Integrated Interfaces:

- Serial interface / IP e.g. ESPA4.4.4 / ESPA+, OPC to nurse call, emergency call, fire alarm and building master control systems
- Network interfaces: Email, SNMP, for the integration of IT alarms via the management tools HP Openview, BMC Patrol, Tivoli, Cisco Works, Peregrine, OmniVista New Voice Designer for SNMP (Flowchart Script Editor)
- PC keyboard / Emergency keys (client software)
- Web infrastructure for standardized and situation-specific triggering of alarm scenarios
- XML level on IP telephones with graphic display
- Video alarm (movement alarm and image analysis)

### Alarm Management:

- Centralized administration for several MobiCall systems within a LAN/WAN network
- User-friendly and independent management via alarm center and optional WEB interface possible
- Manual or automated group and personnel administration, supporting LDAP capability
- Management of up to 128 interfaces per MobiCall System
- Information distribution in serial or parallel mode with or without conference setup to individuals and groups (Text, Voice message, XML and Video)
- Confirmation and escalation scenarios
- Comprehensive time controls for disposition plans
- Statistics processing for alarm procedures

### Web Management Capabilities:

- Access management based on responsibility levels (ACLs)
- Messenger
- Search and playback of the recorded calls
- Web Visualizer (integrated layout tool)

### Alarm Message Receiver:

- All telephones by means of voice message
- System terminals with voice and text message (Video integration possible with XML-enabled telephones)
- Mobile terminals DECT & WiFi
- New Voice is certified by Spectralink: [www.spectralink.com](http://www.spectralink.com)
- GSM with text and visual information (SMS / MMS / Video)
- Email, internal and external pager by means of text information
- Loudspeaker via IP

Mobicall is multi-functional, flexible, and future-proof (Security over IP)... Your Investment Protection!

The leader in format, thanks to almost two decades of experience as System Integrator in the converging market and to ongoing further development in the United States and Europe.
